Our Services

Sea Cargo – Exports – FCL (Full Container Load)

Since our inception in 2010, Bluewater Logistics Ltd (BWL) has been actively involved in shipping, providing comprehensive end-to-end logistics solutions for our esteemed customers. Our services encompass the entire logistics journey, commencing from the shipper's location. We own and operate a fleet of trucks and trailers to facilitate cargo pick-up, customs verification, and documentation. Once customs formalities are completed, our trailers transport the containers to the port for loading onto vessels. In the realm of FCL containers, we maintain contract codes with shipping lines, allowing us to consistently secure the best ocean freight rates through skilled negotiation. BWL's operations are nationwide, with a presence at major and minor ports across India, enabling us to serve our global clientele effectively.

Sea Cargo – Exports – LCL (Less than Container Load)

BWL provides LCL cargo services, tailored to meet our customers' requirements. We collect cargo from various ICD and port locations, perform export packing and palletization, handle customs clearance, and transport the cargo from the warehouse to the CFS (Container Freight Station) for consolidation. Our meticulous approach ensures the safe export of cargo to various international destinations.

Sea Cargo - Imports (LCL and FCL)

We expertly manage sea imports, handling shipments ranging from full container loads to 1 kg parcels from diverse countries to India on an ex-work basis. Our process involves coordinating with suppliers to collect materials from their warehouses outside India and delivering them to the consignee within India, post-completion of all customs formalities. This approach not only streamlines the transport and handling process but also leverages our established network and infrastructure to reduce costs.

Air Cargo Exports and Imports

As proud members of IATA and FIATA, BWL is registered at multiple airports in India, enabling us to manage air cargo operations from India to various international destinations. Our services include cargo pick-up from exporters' warehouses, customs clearance conducted by our in-house team, and loading onto aircraft for seamless delivery to the destination countries.

Trucking

BWL is well-versed in road trucking, both domestically and in other SAARC countries. We maintain a dedicated fleet and partner with select trucking companies to transport cargo from supplier warehouses to any part of India, including all major ports. Our dedicated customer service team ensures timely delivery and provides tracking services for a seamless experience.

Fumigation Services

We have introduced fumigation and pest control services at ICD Hyderabad, offering pest-free and bug/worm-free services.

Palletization and Export Packaging

BWL provides comprehensive export packaging services, adhering to international standards, ensuring that our clients' cargo meets the requirements for export to various countries.

Break Bulk Handling and Stevedoring

We have initiated a new division specializing in break bulk cargo handling at Kandla and other ports in Gujarat. Our investments in infrastructure and equipment, including forklifts, bunkers, trailers, and related machinery, enable us to efficiently handle bulk commodities. Major cargo types in this segment include coal imports, salt exports, and various other major and minor commodities.

Vessel Agency Services

BWL operates a vessel agency division, delivering services to vessel owners for both ship imports and exports from Kandla, Mundra, and the Gujarat coast. Our fleet's robust capabilities, coupled with our widespread presence at ports, support door-to-door deliveries for various companies.

Mini Bulk Carriers (MBCs)

We are in the process of acquiring mini bulk carriers with a deadweight tonnage (DWT) range of 2000 to 5000, equipped with RSV 3 and 4 categories. This acquisition will support material transportation between ports, including minor ports, covering distances of 300 to 500 nautical miles. This endeavor is in alignment with India's emergence as a prominent shipping hub, where the utilization of small ships (MBCs) will enhance the efficiency of cargo transportation.

Chartering

Our vessel and chartering division has established strong associations with major ship owners. These partnerships enable us to secure bookings for their vessels, ensuring better tonnage and competitive freight rates.

Bluewater Logistics Ltd has built a robust presence and a reputation for providing comprehensive and high-quality logistics services to our valued clients, both in India and worldwide. Our dynamic approach and dedication to excellence continue to drive our progress in the maritime and logistics industry.
